自動饅頭焼成機

S-II 2 4 TH Automatic MANJYU Machine

Sofuman S-II24TH

主な製品 カスタードクリーム、こい餡入り饅頭

生産能力 350~500個/h

Making Power 350~500pcs./h

焼型速度 3~6分 インバーターによる無断変速

Round Speed 3~6min./IR

熱源 L.P.G きたは 都市ガス

動力源 3P 200V 200W

Motor 3P 200V

据付面積 H1808×W1200×D1250mm

Installation Area H|808×W|200×D|2

型 サイズ H85×W75mm

Size of Molding Plate 85×75mm

重 量 550Kg

型材質真鍮

Material of Molding Plate All brass with por

Features

We make several design

molding plate as your request
In order to make good "sponge cake", this machine is invented. so you'll get soft and good taste. It features a system in which the opening and closing piston keeps the baking material and custard cream intact. The material of these molding plate are made of our selves alloy and have complate sanitary arrangement. Adjusting heater is only to touch the adjuted. This machine is suitable to wholesalers and department stores.
